

Basis trestle table

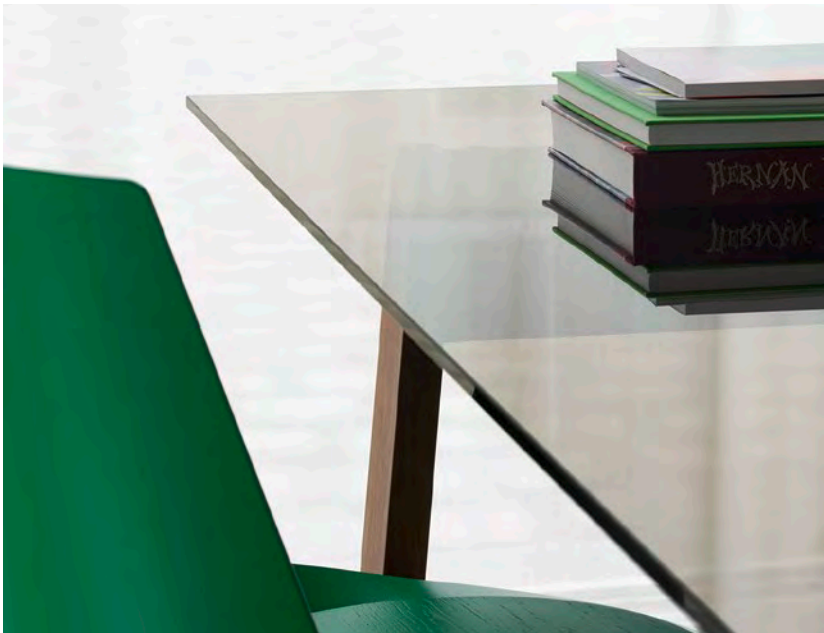

e15 2018

The trestle table Basis is a refined and adaptable system of solid wood trestles and beams constructed with traditional joinery techniques. The simple and qualitative design showcases a broad range of materials and flexible solutions for living and working. In addition to European walnut and solid oak in oiled or white-pigmented surfaces, the collection also includes brown coloured glass, offering a special contrast with the solid wood trestle base.

The trestle table was launched at the Salone Internazionale del Mobile 2018 in Milan. It represents a continued collaboration between David Chipperfield and furniture manufacturer e15, which commenced in 2015 with the Fayland product family.

Launch date	April 2018
Manufacturer	e15, Germany
Design	David Chipperfield
