

# Carmen Würth Forum

Künzelsau, Germany 2006–2020

The Adolf Würth company is one of the world's largest retailers of assembly and fastening materials, with its headquarters situated near the town of Künzelsau in southern Germany. The brief called for a large events hall and a smaller hall for chamber music recitals. The complex not only serves the needs of the company but can also be used for external events.

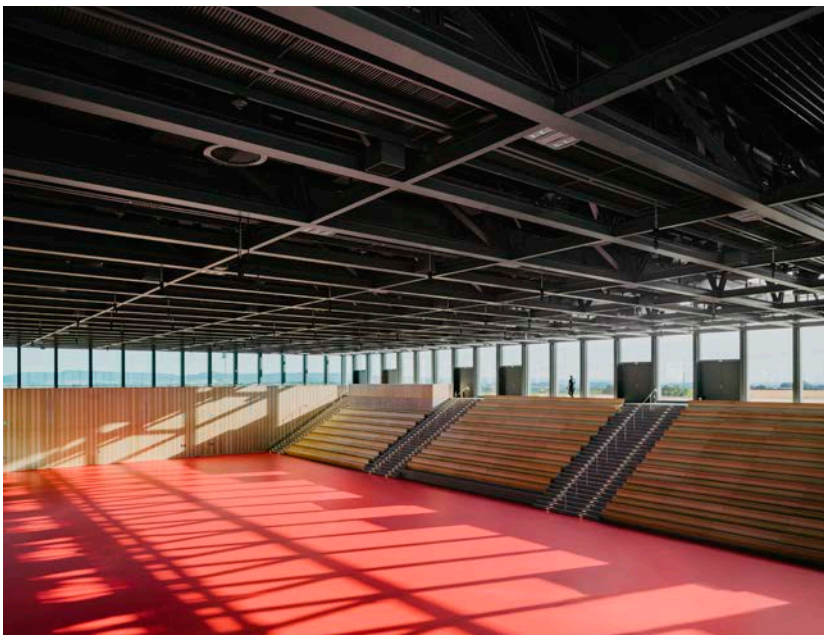

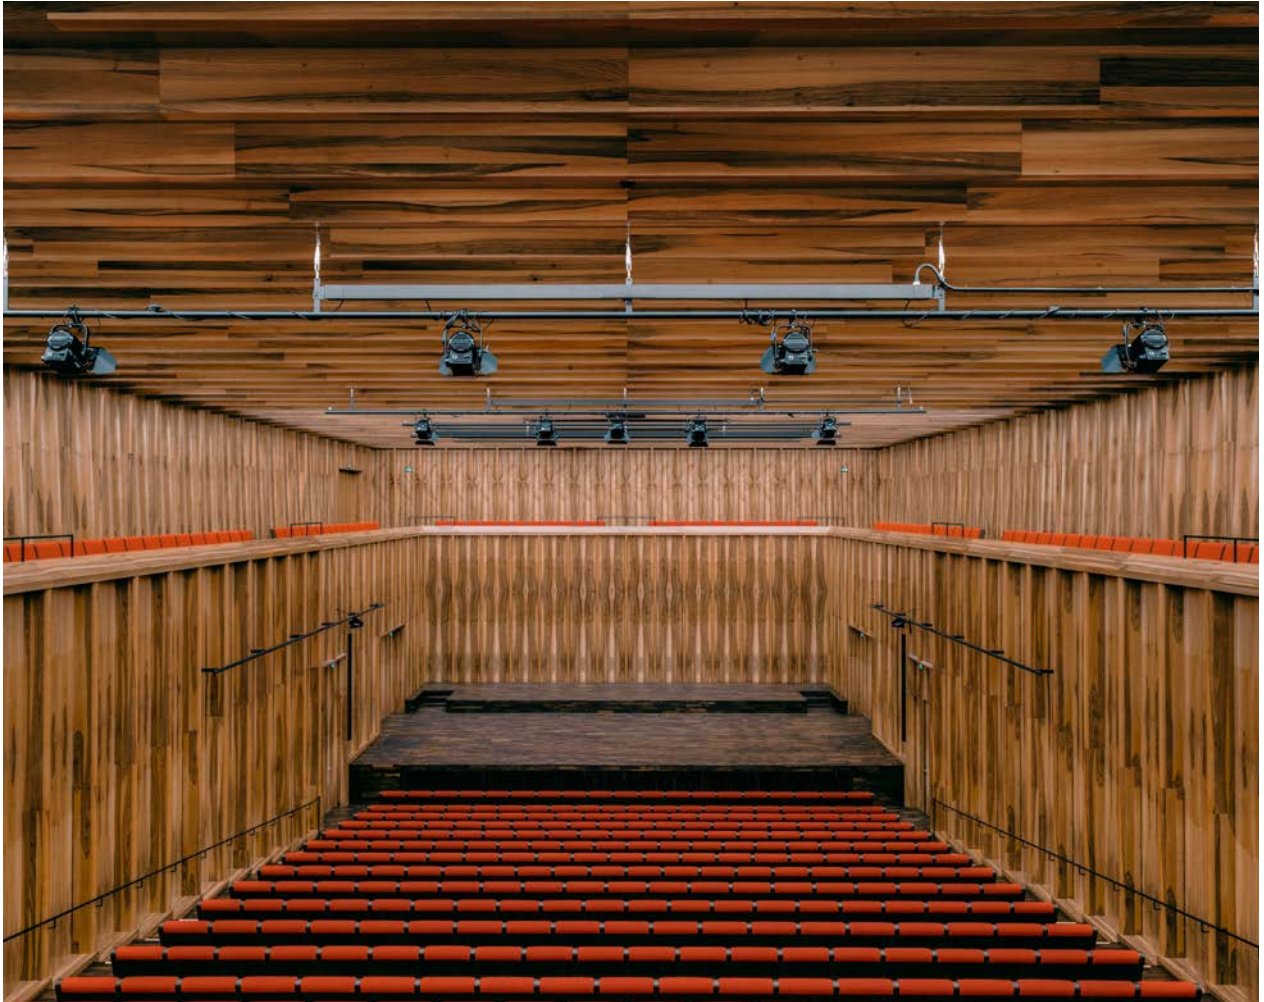

The new building is placed at a short distance from the main office complex and surrounded by open fields. It is embedded in the landscape, with the chamber music hall and the lower part of the events hall hidden beneath a natural mound. Incisions in the hillside are made on either side of the mound and establish two framed external spaces. These are flanked by retaining walls of concrete, poured in layers that make reference to the sediment strata of the site. The larger southern forecourt leads to the main entrance and serves as a forum for diverse outdoor events, such as open-air concerts. The multi-purpose event hall, which is accessed from a naturally lit foyer, provides space for 3,500 people, and has a trussed-steel roof. While the lower half of the hall is sunk into the ground, the upper gallery level rises above the highest point of the site and is glazed on all sides.

The foyer also provides access to the more intimate chamber music hall, which from the outside is only perceptible as a modulation of the landscape. This hall seats up to 600 people and is lined in walnut. The company's corporate colour of red runs throughout the design of the interior spaces, appearing in the seating of the chamber music hall as well as in the flooring of both the foyer and the events hall. Sculptures from the collection of Reinhold Würth enrich the green spaces surrounding the building. A conference centre and a museum for the Würth art collection are to follow in a second construction stage.

Competition	2006–2007
<i>First stage</i>	<i>Chamber music hall and event hall</i>
Project start	2011
Completion	2017
Gross floor area	11,000 m <sup>2</sup>
<i>Second stage</i>	<i>Conference centre and museum</i>
Project start	2018
Completion due	2020
Gross floor area	5,000 m <sup>2</sup>
Client	Adolf Würth GmbH & Co. KG
Architect	David Chipperfield Architects Berlin
